

TWINCORE - Seminar

Wednesday November 29th, 2017, 12 a.m.
TWINCORE Lecture Hall 0.02

Identification of rare genetic variant in the interferon induction pathway which predisposes patients to severe Herpes Simplex Encephalitis

A background image of a laboratory setting. A person in a white lab coat is holding a red microcentrifuge tube and a pipette. A pipette tip is visible in the foreground, and a pipette tip is also visible in the background. The background is slightly blurred, showing laboratory equipment and a red surface.

Rune Hartmann, Ph.D.

Associate Professor, Dept. of Molecular Biology and Genetics, Aarhus University

Research area: Surviving a virus infection; how mammals establish innate immunity against viral infections
