

# TWINCORE - Faculty Club

Tuesday, December 15<sup>th</sup>, 2015, 6 p.m.

TWINCORE Lecture hall

## “Deep sequencing and bioinformatics”

### Prof. Dr. Thomas Illig

Biobank (HUB), MHH

„NGS and post-NGS: Perspectives in the TRAIN area”

### Dr. Robert Geffers

Genomanalytik, HZI

„NGS Core Facilities - Are we prepared to face the challenges of biomedical research?”

### Prof. Dr. Michael Meyer-Hermann

System Immunologie, HZI

„Functional computational biology”

Sequencing methods have improved dramatically in recent years and an end to this trend is not in sight. It is a challenge to accompany this development with the respective latest state of the art equipment and adequate data analysis methods. We want to discuss how MHH and HZI can work together to meet this challenge jointly.
